

# VEER TIWARI

Generative AI Developer | +91-7017680500 | [veertiwari.personal@gmail.com](mailto:veertiwari.personal@gmail.com) | [LinkedIn](#) | [GitHub](#)

## EDUCATION

|                                                                                                                       |                                |
|-----------------------------------------------------------------------------------------------------------------------|--------------------------------|
| <b>Shivalik College of Engineering</b><br><i>Bachelor of Technology in Computer Science (Data Science) CGPA: 7/10</i> | Dehradun, India<br>2023 – 2027 |
| <b>CBSE Board (Senior Secondary)</b><br><i>Percentage: 75%</i>                                                        | India<br>2023                  |

## TECHNICAL SKILLS

**Languages:** Python, SQL, C++  
**Machine Learning:** Scikit-learn, TensorFlow, Keras, ANN, CNN, LSTM, Transfer Learning  
**Generative AI:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, LangChain, LangGraph, AI Agents, Human-in-the-Loop (HITL)  
**Libraries:** Pandas, NumPy, Matplotlib  
**Vector Databases:** FAISS, ChromaDB  
**Tools:** Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, VS Code, PyCharm

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| <b>Junior Tech Assistant</b><br><i>Blue Heart Robotics</i>                                                                                                                                                                                                                                                                                                                                                                      | Jan 2024 – Feb 2025<br>Delhi, India |
| <ul style="list-style-type: none"><li>Analyzed user and website data using Python, SQL, and exploratory data analysis (EDA) to support business decisions.</li><li>Developed NLP-based chatbot solutions and improved AI-driven user interactions, reducing manual query handling by 40%.</li><li>Implemented SEO and analytics-driven strategies that increased website traffic by 75% and enhanced user engagement.</li></ul> |                                     |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                     |      |
