

# VEER TIWARI

Data Analyst | +91-7017680500 | veertiwari.personal@gmail.com | LinkedIn | GitHub

## EDUCATION

### Shivalik College of Engineering

Bachelor of Technology in Computer Science (Data Science) CGPA: 7/10

Dehradun, India

2023 – 2027

### CBSE Board (Senior Secondary)

Class XII Science Stream Percentage: 75%

India

2023

## TECHNICAL SKILLS

**Languages:** Python, SQL, C++

**ML / Deep Learning:** Scikit-learn, TensorFlow, Keras, ANN, CNN, LSTM, Transfer Learning

**Artificial Intelligence:** NLP, Computer Vision, Sentiment Analysis

**Libraries & Data Analysis:** Pandas, NumPy, Matplotlib

**Databases:** MySQL, PostgreSQL

**Tools & Environments:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, PyCharm

**Core Concepts:** Data Preprocessing, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning

## PROFESSIONAL EXPERIENCE

### Junior Tech Assistant

Blue Heart Robotics

Jan 2024 – Feb 2025

Delhi, India

- Analyzed user and website data using Python, SQL, and Exploratory Data Analysis (EDA) techniques to identify key operational trends and support data-driven executive decision-making.
- Optimized AI chatbot performance through NLP-based intent recognition and slot-filling improvements, reducing manual query escalation and handling times by 40%.
- Implemented SEO and analytics-driven digital strategies, boosting organic web traffic by 75% and significantly improving user digital retention.

## PROJECTS

### AI-Powered Webinar Moderation System | Python, NLP, Scikit-learn, TF-IDF | GitHub

2026

- Built an end-to-end NLP-based classification system to categorize attendee chat messages and prioritize urgent complaints in real time during live webinars.
- Implemented semantic similarity clustering algorithms to group duplicate queries and eliminate repetitive host chat clutter.
- Developed an automated priority scoring engine that calculates severity index to automatically escalate critical technical bottlenecks to moderators.

### Stock Price Prediction System | Python, TensorFlow, LSTM, Pandas | GitHub

2025

- Developed a Recurrent Neural Network (RNN) utilizing Long Short-Term Memory (LSTM) units to forecast stock market trends from historical multi-variate financial data.
- Executed comprehensive data preprocessing, feature scaling, windowing, and rolling-mean analysis to minimize prediction variance.
- Evaluated model performance using regression metrics (RMSE, MAE, R<sup>2</sup>) and built automated visual dashboards comparing predicted vs. actual prices.

Third Eye for Blind | Python, OpenCV, Computer Vision, IoT | GitHub

2024

- Engineered an embedded real-time assistive hardware/software vision system for obstacle detection using customized OpenCV computer vision algorithms.
- Integrated low-latency object detection pipelines with synthetic voice / audio feedback modules to guide visually impaired users safely.
- Secured ₹10 Lakh in innovation funding from Defence Research and Development for novelty and high social impact.

ACHIEVEMENTS & LEADERSHIP

---

Google Campus Ambassador

2025

Google

College Campus

- Represented Google on campus, organizing technical workshops, hackathons, and developer engagement sessions for 200+ students.
- Coordinated campus outreach initiatives, boosting student participation in cloud and machine learning certification programs.

Level 7 Expert Coder

2024

Coding Ninjas

CodeStudio

- Engineered clean and efficient solutions for over 300 algorithmic coding challenges on CodeStudio, specializing in Data Structures and Algorithms.
- Improved personal code execution runtime efficiency by 20% through rigorous algorithmic time & space complexity optimization.
